DETAILED ACTION

1. *This Supplemental Notice of Allowance is issued to correct the improper dependency of claim 15 as noted below in the Examiner's amendment. Applicants have now cancelled claim 20. Amended claims 1-19 have now been allowed over the prior art of record.*

EXAMINER'S AMENDMENT

2. *An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.*

Authorization for this examiner's amendment was given in a telephone interview with Mr. Holmes Anderson on 15 March 2006.

Amend the preamble of claim 1 of applicant's claims as follows:

*"1. A channel shortening method **for training a time domain equalizer** comprising:"*

(The remaining body of the claim is as submitted)

The examiner further amends dependent claim 15 in order to correct improper dependency. Amend dependent claim 15 as follows:

*Delete the numeral "15" after the word "claim" and insert the numeral "**14**".*

The first line of claim 15 should now read as follows:

*"15. (Original) The program product of claim **14**, wherein..."*

Drawings

3. *Applicant's proposed drawing correction (replacement sheet) submitted on 2 November 2005 has been approved by the examiner. Applicants request for inclusion of color drawings for figures 5, 6, 7, 8A, and 8B as petitioned under 37 CFR 1.84 has also been acknowledged. However, now that claims have been allowed, formal drawings are required.*

Response to Arguments

4. *Applicant's arguments filed 23 February 2006 with respect to claims 1-20 have been fully considered and found to be persuasive.*

Regarding applicant's response to 101 rejections: *The examiner withdraws the 101 rejection in view of applicant's amendment to the claims and the examiners amendment presented above.*

Regarding applicant's response to 102/rejections: *The examiner withdraws the 102 rejection of claims 1-19 in view of applicant's amendment to the claims, the examiners amendment presented above, and applicants arguments submitted 23 February 2006.*

Allowable Subject Matter

5. *Claims 1-19 are allowed over the prior art of record.*

The following is an examiner's statement of reasons for allowance:

Applicants are disclosing a method and apparatus for channel shortening inclusive of coupled first and second communications devices, transmission of training

signals, determining coefficients for a time-domain equalizer, a multi-pass auto-regressive averaging filter, and using the multi-channel Levinson algorithm in determining a shortened impulse response. This has been disclosed in the prior art of record.

However, the prior art does not disclose the specific combination of elements inclusive of forming a time-mirrored image of the first shortened channel impulse response, further determining a second channel impulse using a second channel modeling scheme (specification: pages 21-41), and combining the two responses to form a third response that is employed to configure a time domain equalizer as now required by amended independent claims 1 and 14. (See specification: pages 17-32, Figs. 12-15, for example)

The closest prior art uncovered during examination teaches certain limitations of the claimed invention as follows:

U.S. Patent 6,233,276 issued to Simeon: teaches a communications system inclusive of coupled first and second communications devices including transmission of training signals and determining coefficients (Levinson algorithm) for a time-domain equalizer and a multi-pass auto-regressive averaging filter in determining a shortened impulse response. However, Simeon does not explicitly disclose the specific combination of elements inclusive of forming a time-mirrored image of the first shortened channel impulse response, further determining a second channel impulse using a second channel modeling scheme, and combining the two responses to form a

third response that is employed to configure a time domain equalizer as now required by amended independent claims 1 and 14.

The features noted above therefore render the claimed invention non-obvious over the prior art of record. Dependent claims 2-13 and 15-19 are deemed allowable as depending from independent claims 1 and 14 respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
